

TOP PYTHON LIBRARIES FOR DATA ENGINEERS IN 2026

AI POWERED CAREER ROADMAP AT:
[BIMBERIO.COM](https://bimberio.com)

PREFECT

A modern workflow orchestration library used for scheduling, retries, and monitoring data pipeline runs

**AI-POWERED CAREER ROADMAPS
AT [BIMBERIO.COM](https://bimberio.com)**

SQLMESH

A data transformation framework that provides semantic understanding of models and safe environment isolation for SQL pipelines

**AI-POWERED CAREER ROADMAPS
AT [BIMBERIO.COM](https://bimberio.com)**

DLT (DATA LOAD TOOL)

An open-source library for building source-to-destination data ingestion pipelines with minimal code and automated schema evolution.

AI-POWERED CAREER ROADMAPS
AT [BIMBERIO.COM](https://bimberio.com)

PYSPARK

The industry-standard Python API for Apache Spark, used for distributed large-scale batch and streaming data processing [2, 6].

**AI-POWERED CAREER ROADMAPS
AT BIMBERIO.COM**

GREAT EXPECTATIONS

A library for defining, documenting, and validating data quality rules to prevent and report on issues reaching production

AI-POWERED CAREER ROADMAPS
AT [BIMBERIO.COM](https://bimberio.com)

PANDERA

A statistical validation library that provides type-hinting and schema enforcement for pandas, Polars, and Spark DataFrames

**AI-POWERED CAREER ROADMAPS
AT [BIMBERIO.COM](https://bimberio.com)**

DUCKDB

An in-process analytical database for fast OLAP queries on local or remote files with zero server setup.

**AI-POWERED CAREER ROADMAPS
AT [BIMBERIO.COM](https://bimberio.com)**

POLARS

A high-performance Rust-based DataFrame library designed for parallel, multi-threaded transformations and mid-scale ETL.

**AI-POWERED CAREER ROADMAPS
AT [BIMBERIO.COM](https://bimberio.com)**

A backend-agnostic DataFrame library that allows writing a single Python API to run on over 20 different SQL backends.
